Fire and Burglary Protection

Diva cabinets protect your data media from fire and burglary. Available in five sizes, all models are lightweight and stylish, offering optimised storage capacity and a choice of interior features.

Key features

PROTECTION

✦ Certified burglary resistance as per EN 14450 (S2 Grade)

✦ Certified fire resistance as per EN 1047-1 (Grade S 120 DIS, i.e. 120 minutes for data media)
CAPACITY

✦ 100 litres

✦ 150 litres

✦ 250 litres

✦ 350 litres

✦ 650 litres

KEY BENEFITS

✦ Highest level of fire resistance in our portfolio, offering up to 2 hours of protection for the most sensitive types of data media

✦ Certified burglary resistance (S2 Grade)

Fichet-Bauche guarantees

Our products are subjected to the most stringent tests approved by insurers and A2P-certified by France's National Centre for Prevention and Protection (CNPP). This is the result of integrating our own test laboratory into our factory to impose conditions going even further than those of certifying bodies. Installation is also carried out by our own technicians to ensure certification of your safe is always preserved.

A hallmark of our brand

With 200 years of experience as master locksmiths, we develop and manufacture our own exclusive locks. This is one of the key strengths of our safes and a guarantee of high security. We remain committed to permanent investment in R&D, always looking for more functionality, more resistance, new materials and more advanced lock technologies.

Product details

With changing methods of information storage, data media have become more sophisticated and ever more widespread. Yet they remain highly sensitive to temperature, humidity, dust, light exposure and the passing of time. Designed to protect them, Diva cabinets are built with a combination of two exclusive fireproof materials ensuring interior temperature never exceeds 50°C in case of fire. Their locking assistance system and the ergonomic positioning of handles also allow for permanent ease of use.

PERFORMANCE AND SECURITY

Diva cabinets are equipped with state-of-the-art technology designed and developed by Fichet-Bauche laboratories.

✤ Thanks to exclusive materials, clever design of joints and one-piece construction, they can guarantee stable levels of temperature and humidity to preserve your sensitive data media.

✤ Fichet's patented Mirium composite barrier material provides efficient thermal insulation. Thanks to its reinforced cellular structure, this material preserves outstanding mechanical integrity in the event of an impact or fall.

✤ Multiple layers of seals also provide an effective barrier to flames, hot gases, dust and moisture.

✤ Galvanised steel construction protects against corrosion.

INTERIOR FITTINGS AND OPTIONS

✤ Removeable shelf
✤ Shelf for suspension file frames
✤ Universal sliding tray
✤ Sliding tray with dividers
